## Commuting Patterns

## **What does it mean and why is it important?**

Commuting patterns of workers show how mobile a workforce is in a community or county. In other words, how far do people living in a given area travel to work?

Locally, the highest percentage of workers travel between 15-29 minutes to work, which would keep them primarily within the county or to a neighboring county. Fond du Lac County also has a high percentage of workers traveling less than 10 minutes indicating many live and work in the same community. Overall, our workers commute less than the state or U.S. average at 20.1 mins vs. 21.8 and 25.7 respectively.
